Languages

English

Reading: very good **Writing:** good **Speaking:** good

Education

Graduate(Thesis Phase)

Akdeniz University, Antalya
Computer Engineering 2018 –

Under Graduate

Cyprus University, Nicosia
Computer Engineering 2004 – 2010

Skills

Programming Languages

Basic: Python
Intermediate: Kotlin, Bash Script, PHP, JavaScript, HTML, CSS
Advanced: Java

Programming Skills

- **Frameworks & Libraries** Primefaces, React JS, Spring Framework Ecosystem(Spring Boot, Spring Cloud, Spring Security, Spring Web etc.)(Advanced)
- **Database Management** SQL, MySQL, PostgreSQL, ORM(MyBatis, Hibernate) - **Build Tools :**Maven, NPM
- **Project Management**Jira, GitLab
- **VCS** Git, SVN
- **CI Tools** Jenkins, GitLab CI, GitHub Actions
- Object Oriented Paradigm
- Flexible Software Architecture Design
(Back-End (DB & Business Layers))
- Microservices Architecture (Spring Boot Services)
- Multi Module Project Structure (with maven)
- Centralized Authentication (OAuth 2.0 Spring Security + Keycloak)
- Devops Cycle, Linux Server Management,
- Office Apps, Linux Terminal, Effective Search Engine Usage

Experiences

Work Experiences

Jr. R&D Software Engineer

Date: 07/2018 - 08/2020 (2 year 1 months)
Place: Cantek Group
Goal: Based on the existing architecture, a flexible and scalable architecture solution was built and implemented from scratch.
Job Descirption:
- Using Hybrid Database Architectures with combining PostgreSQL + Cassandra technologies
- Developing Java Microservices with Spring Boot (mostly Spring Framework Core, Spring Security and Spring Cloud Modules)
and deploying them as Docker containers on the server
- Configure a system running on the Ubuntu 16.04 server and apply DevOps using CI/CD Softwares running inside separate Docker containers.
— Managing source code via GitLab
— Compiling Spring Boot applications with Maven via Jenkins
— Serving JARs on the JFrog Artifactory via Jenkins
Outcome: A customizable system solution has been provided to solve the problems in the old system and to meet the requirements requested by the users from the old system.   ,

Java Developer

Date: 06/2016 - 06/2018 (2 year)
Place: Akdeniz University BAUM
Goal: Implementing a computer-based assessment system for educational assessment.
Job Description:
- Developing Java Web Apps (Spring MVC) with using Spring framework
- Providing communication between web apps and database over RESTful Service
- Compiling applications with Maven, sending them to the SVN environment, serving them on the Tomcat Server via Jenkins.
Outcome: Use of information technology in assessment for educational assessment

Side Projects

IconConference2017 Website

Custom-designed WordPress theme for the customer. The theme also includes a basic file upload mechanism. The theme was used for IconConference 2017 conference website.

Spring VIP

Link: https://springvip.yazilim.vip/
A Java Spring Library that provides helpful generic and utility classes. Some of the features provided by the library are generic CRUD Service and Rest controllers. maescript

Maescript

Link: https://yazilim-vip.github.io/maescript/
A very useful set of Linux commands

Attended Organizations

UBMK 17: Crew
3. Antalya Bilim Şenliği: Participant
Linux Seminar: Undergraduate Seminar
